

# Sarmishta Aratikatla

New York | +1 (917) 499-2185 | sarmishtaaratikatla@gmail.com | [Linkedin](#)

## Education

---

New York Institute of Technology | Manhattan, New York  
Master of Science in Cybersecurity  
GPA: 3.8

Sep 2025 – Dec 2026

Heriot Watt University | Dubai, United Arab Emirates  
Bachelor of Science in Computer Science Hons. Cybersecurity  
GPA: 3.7

Sep 2021 - July 2025

## Relevant Experience

---

Techno Horizon | Dubai, UAE

May 2024 – May 2025

Technology Associate. Supported the execution of hospitality technology projects by integrating AI, IoT and cybersecurity solutions to enhance secure guest onboarding and operational efficiency.

- Led the integration of secure AI-driven systems for hospitality operations, incorporating access control, data protection, and secure onboarding workflows, reducing operational vulnerabilities and improving check-in efficiency by 18%
- Designed and implemented data analysis models to identify anomalies in customer behavior and digital transactions, supporting fraud detection, improving inventory security, and enhancing operational efficiency by 20%

Mashreq Bank | Dubai, UAE

July 2022 – Sep 2022

Cybersecurity and Engineering Intern. Delivered security enhancements across authentication and access control systems, strengthening risk posture and reducing unauthorized access.

- Monitored and analyzed security events using SIEM tools, identifying potential threats and reducing false positives through alert tuning.
- Assisted in implementation of authentication systems including multi factor authentication, reducing unauthorized access by 30%.
- Conducted risk assessments aligned with NIST and ISO 27001 frameworks, identifying gaps in access control and data protection.

## Relevant Projects

---

Smart Contract for Ethereum Transactions, Heriot-Watt University | Dubai, UAE

Sep 2024 – May 2025

- Developed backend logic using Solidity to enable secure automated transactions
- Conducted functional and security testing with Truffle Suite and Ganache, identifying and fixing 3 critical vulnerabilities, improving contract reliability by 30%.

Mini Threat Intelligence Harvester | Personal Project

GitHub: <[link](#)>

- Built a Python based threat intelligence tool to collect, process, and analyze security data from multiple open-source feeds.
- Designed data pipelines to structure raw indicators into actionable insights for threat detection and analysis.
- Enabled identification of suspicious patterns and potential threats by correlating indicators across multiple data sources.

## Additional Information

---

Languages: English (Fluent), Hindi (Fluent), Telugu (Native), Arabic (Intermediate)

Certifications: Blockchain: Beyond the Basics (LinkedIn Learning, 2025); IT Security Foundations: Network Security(LinkedIn Learning, 2025); Forage : Mastercard - Cybersecurity Job Simulation, Forage : Deloitte - Cybersecurity Job Simulation.

Technologies: Python, JavaScript, SQL, Solidity, Bash, REST API Integration, Splunk SIEM, Wireshark, Nmap, Nessus, Burp Suite, Snort IDS, Kali Linux, AWS, Microsoft Azure, PowerShell, Bash.

Skills: Penetration testing, Incident Response, Digital Forensics, Threat Modeling, Risk Assessment, SIEM Analytics, Blockchain Security, NIST and ISO 27001 Frameworks, OWASP Top 10, MITRE ATT&CK, Problem Solving.
